The
construction of
the 2nd plant is
completed

2025
The construction
of the 3rd plant is
started

In the wake of a now centuries-old tradition, with the utmost respect for the ENVIRONMENT in which it operates and which it preserves, of the ETHICAL values that have distinguished its activity and growth, with attention always to RESEARCH for the development of new projects and the birth of new interesting products.

These are the THREE cornerstones that have always nourished the roots of camillosirianni and that form the basis of its daily management, its strength and its growth.

Factory 3
under construction

Factory 1

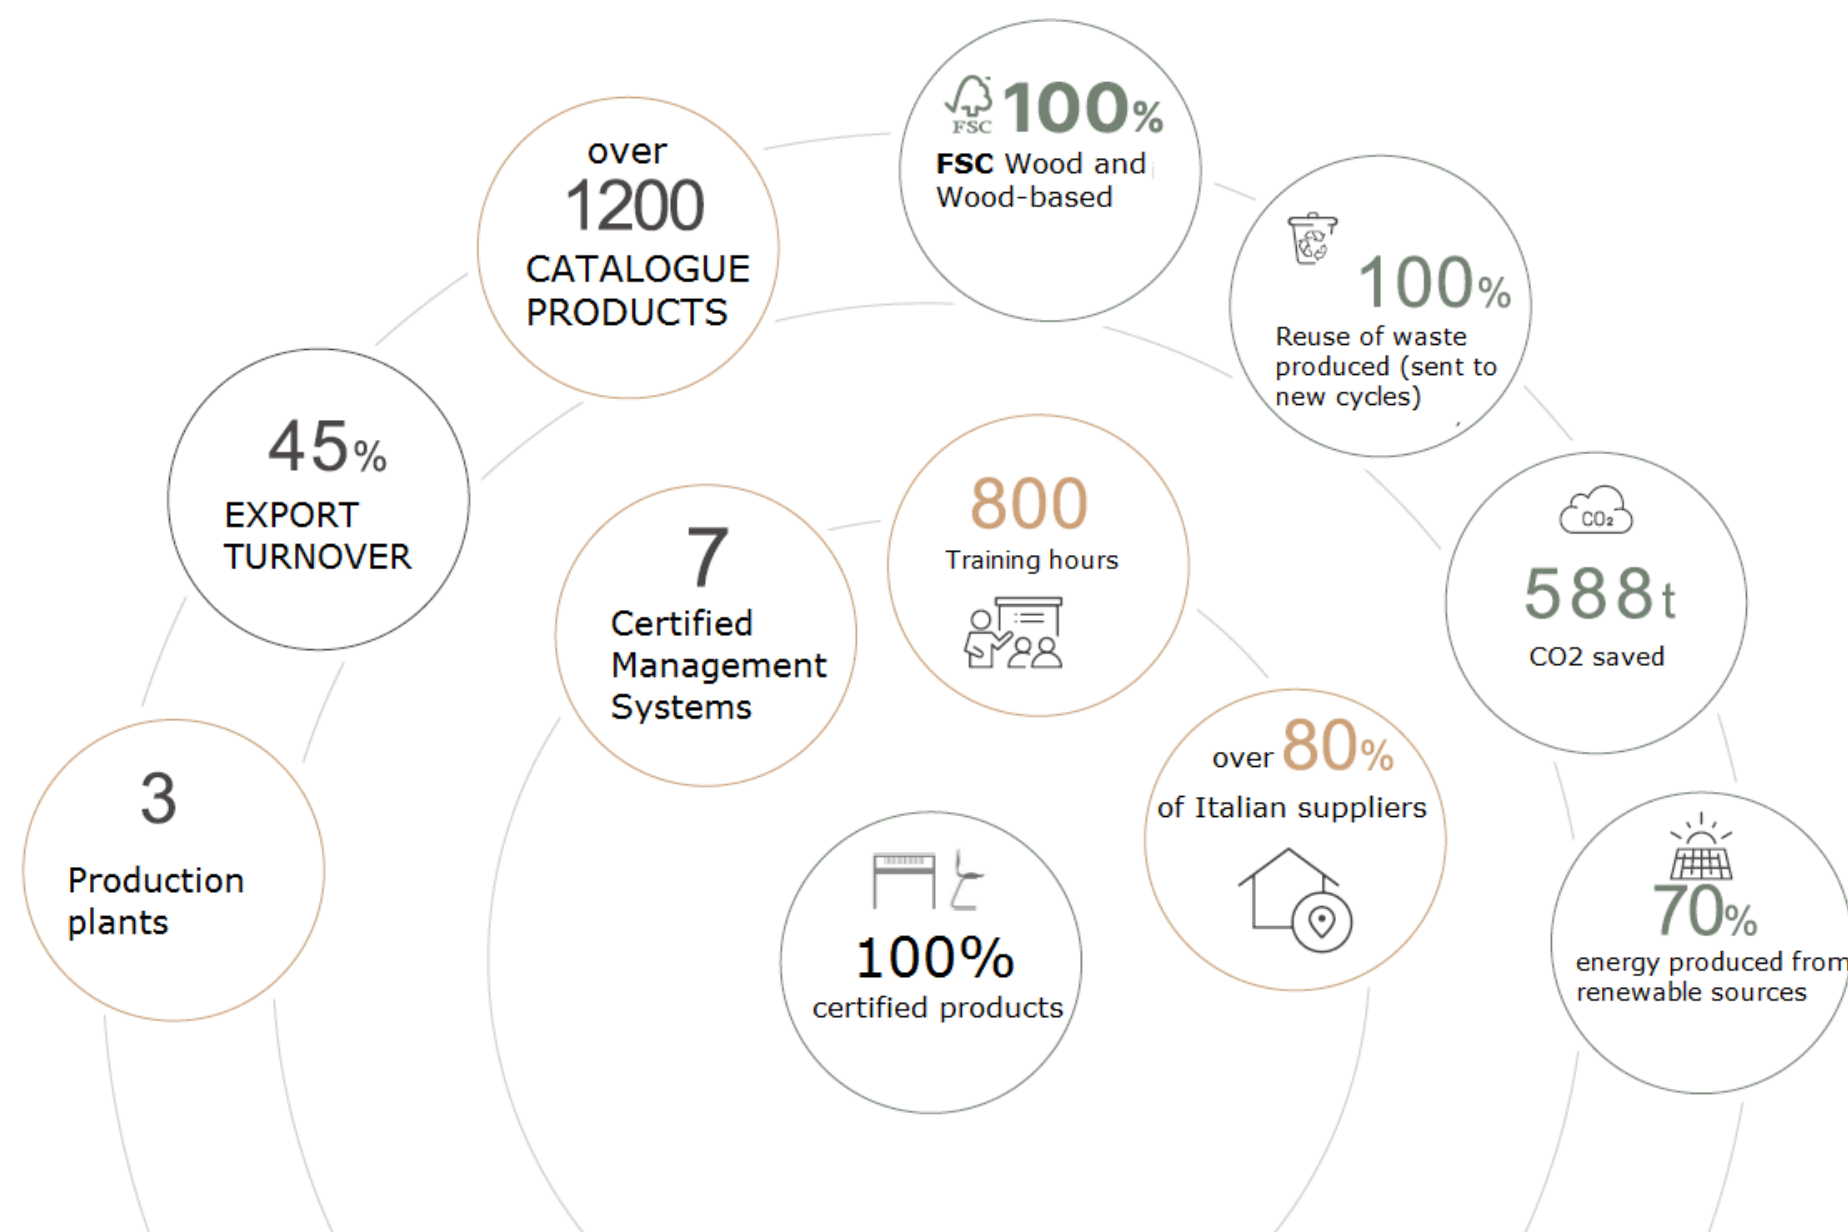

The values, strategy and objectives of a company are expressed in its policy and, one of the cornerstones of camillosirianni's policy, today is represented by the protection of the environment and the rigorous respect of the prescriptions dictated by the European Community on the subject: the Green Public Procurement and the European Green Deal. The production plants are located in the heart of Sila, one of the largest forests in Europe and use solar energy, among the renewable energies that do not harm the natural resources of our planet.

VISION

camillosirianni develops its business with the aim of further establishing itself as a reliable and competent partner in the school furniture sector; as a point of reference in Italy and abroad for the creation of complete projects.

camillosirianni is an established brand: it identifies a company that, over the years, has not changed its nature compared to its roots but that, with great conviction and commitment, has been able to maintain its original identity and values, the strong artisan qualities of Italian style, good quality materials and Made in Italy and raw materials with low environmental impact.

A photograph of an industrial robotic arm in a factory setting. The arm is white and black, with a welding torch at the end. It is positioned over a workbench, and a bright light is visible from the welding process. In the foreground, a person's hands are holding a handheld electronic device with a screen and buttons. The background shows a blue wall and a window with a grid pattern.

02. ETHICS

camillosirianni has adopted a corporate code of ethics, which contains a series of social and moral rules drawn up by the company and which all members of the organization must adhere to

camillosirianni is a company that has been led by the same family for three generations, for this reason it has a strong identity based on a human and professional “model” made of correct behavior and balance between respect for people and interest in the company. Over time, practices and scenarios have changed, but consistency with these values is and will remain the best business card to be proud of.

03. ENVIROMENTAL

The values, strategy and objectives of a company are expressed in its policy and, one of the cornerstones of the Camillosirianni policy, today is represented by the protection of the environment and the rigorous respect of the prescriptions dictated by the European Community on the subject: the Green Public Procurement and the European Green Deal.

To create shared value we involve stakeholders in sustainability issues

Three production sites located on the slopes of Reventino, a natural park a few steps from the Sila Plateau, one of the largest forests in Europe, in the heart of the Apennines.

Immersed in a total area of over 30,000 square meters, of which 12,000 square meters are reserved for greenery, rich in vegetation and native plants (beech, oak, larches, maples)

04. RESEARCH

Research has always dictated the path to follow for the development and innovation of products and innovation processes

04

RESEARCH
